

## 1 SUMMARY OF THE AMENDMENT AND RESPONSE

2 Your applicant has revised the sheet of drawings showing Fig. 6 to include Fig.  
3 6A. Fig 6 depicts the use of a key for shaft rotation of a plate. Fig. 6A depicts the use of  
4 a gear rather than a key for shaft rotation of a plate. The "Replacement Sheet" is believed  
5 by your applicant to comply with the Examiner's requirements of December 3, 2004 and  
6 June 3, 2005. Your applicant has amended the Brief Description of the Drawings. Your  
7 applicant has made a good faith attempt to respond to each of the Examiner's  
8 requirements and asks that the objections and rejections be withdrawn and that the  
9 application be allowed to proceed on the merits.

Application No. 10/647,030

1 **II. AMENDMENTS TO THE DRAWINGS**

2 The Examiner, in the Office Action of June 3, 2005, refers to the Office Action of  
3 December 3, 2004 wherein the Examiner required, at page 3, paragraph 3, a Replacement  
4 Sheet for the sheet depicting Fig. 6. The Examiner stated that "This figure shows  
5 modified forms of the drive means because it shows both the gear means 430, and the  
6 key/notch 420/425. These structures are mutually exclusive drive means. Corrected  
7 drawing sheets in compliance with 37 CFR 1.121(d) are required..."

8 Your applicant did respond to the Examiner's action of December 3, 2004.  
9 However, the response was deemed lacking by the June 3, 2005 Office Action. Hence  
10 your applicant now files a sheet of drawings depicting Fig. 6 and new Fig. 6A. The  
11 replacement sheet is marked "Replacement Sheet" and a second sheet is submitted which  
12 shows all of the figures appearing on the immediate prior version. No figures are  
13 cancelled. Your applicant is filing this response by fax on June 24, 2005.

14 Your applicant respectfully requests the Examiner to accept the "Replacement  
15 Sheet" showing Fig. 6 and Fig. 6A, and to withdraw the objection and allow the  
16 application to be prosecuted on the merits.
